Collins Ovuakporaye

Full Stack Engineer

SKILLS

Front-End
CSS · HTML · JavaScript
React.js · Next.js · Typescript

Back-End
Java · C# · C++ · Node.js
Python · Django · FastAPI

Others
UI/UX Design · DevOps
Data Science · Machine Learning

TOOLS & TECHNOLOGIES

Git · Figma · Postman · Beekeeper · Hoppscotch · PostgreSQL · Docker · Google Colab · AWS

PROFILE

I'm a results driven Software Engineer with 4+ years of full-stack development experience across freelance and professional roles. Proficient in React.js, Next.js, Typescript and Python, with practical DevOps exposure including Docker containerisation and cloud automation on AWS and Azure. Computer Engineering graduate (High Honors) with a research-oriented capstone in RAG-based AI systems. Seeking software engineering roles (from all levels) to contribute across the stack and grow toward system design.

EXPERIENCE

Full Stack Software Engineer (Contractor)
Various - Remote
Mar 2022 - Present, 4yrs 6mos. Nicosia, Cyprus

- Project-based development and support for clients across various sectors using React.js, Next.js, Typescript, Node.js, Python and Django
- Integrated third-party APIs, payment gateways; built paginated search, local storage persistence, and responsive UIs from Figma prototypes
- Authored Python, PowerShell automation scripts for AWS (EBS-to-S3 backups) and Azure (patch scheduling)
- Containerized projects with Docker; managed full lifecycle from requirements and design through implementation and deployment

Full Stack Engineer
Highpolar Softwares - Remote
Jan 2022 - Feb 2022, 2 mos. Boston, Massachusetts, US

- Contributed to full-stack feature development in a remote engineering team; participated in code reviews and agile sprint cycles
- Onboarded readily into an existing codebase and delivered assigned features on time

Full Stack Developer
Univelcity - Internship
May 2021 - Jan 2022, 9 mos. Lagos, Nigeria

- Completed a 9-month EdTech internship developing and maintaining frontend and backend features under senior developer mentorship
- Applied Git version control best practices; participated in team code reviews and sprint planning throughout the engagement

PROJECTS

Capstone: Multi-Retrieval RAG
Python · FAISS · FastAPI · React · TypeScript · PostgreSQL · Groq LLM

- Led a 5-person team to build a research RAG system comparing Vector (FAISS), Keyword (BM25), and Hybrid (RRF) retrieval against TriviaQA benchmarks (EM, F1, Precision@k, MRR).
- Designed and developed the Vector Retrieval pipeline, shared JSON API contracts. The system supports document upload, semantic search, keyword search, citation-grounded LLM responses, JWT auth, and chat history
- Implemented Groundedness (no hallucination) and Close Precision benchmark ensuring gold relevance scoring across 5,000+ TriviaQA questions

NASA Media Library Explorer
React.js · CSS · NASA API · Github Pages

- Built a React SPA integrating the NASA Image & Video Library API with paginated search, asset-type filtering (images, audio, video), and local storage session persistence
- Developed modular component architecture (Search, AssetDetail, Paginate, Spinner) with full routing.

AI Slide Deck Generator
Figma · React.js · Redux Toolkit · Typescript · NextAuth · Docker

- Led a 3-person team to build an AI presentation tool that creates slide decks, as part of summer (2025) training at Near East University's (NEU) on-campus AI research facility (AIIT Center).
- Designed, built key frontend features; login, dashboard, slide generation page, slide previews etc.
- Containerized full application stack with Docker. This project was built as a feature on NEU's in-house AI system "Prof Dux".
